## EDUCATION

### Brooklyn College (CUNY)

Bachelor of Science in Multimedia Computing

Brooklyn, NY

June 2022

## SKILLS

**Technology:** React, Bootstrap, MUI, Github, Node.js, Express, Postman, Sequelize, PostgreSQL, Next.js, Django, Firebase

**Languages:** JavaScript, TypeScript, Java, C#, Python, HTML, CSS

**Skills:** Figma, Sketch, Adobe Creative Cloud, Slack, Trello, Microsoft Office 365, Zoom, Google Suite

## EXPERIENCE

### FLXlease

Remote

Frontend Developer

July 2023 – Present

- **Implementing and maintaining web applications using React and TypeScript.** This process helps users to obtain and submit flexible leasing options.
- **Designed web pages and components using Figma,** allowing for an easy, intuitive, and user-friendly experience.
- **Retrieved, sent, and displayed information from GraphQL queries and mutations.**
- **Working with the Chief Marketing Officer to improve SEO.** Using search engine optimization to drive more users to the site and to turn those clicks into customers.

### Healthfirst

New York, NY

Software Engineer and Application Developer Intern

June 2022 – August 2022

- **Developed a cutting-edge, responsive web application utilizing React and TypeScript,** integrating advanced interface features such as intuitive drag and drop functionality and efficient searching.
- **Designed and constructed a mock Electronic Health Record interface and referral broker,** equipped with intelligent alert systems that promptly notify doctors when their attention is required.
- **Engineered a Python machine learning model** by crafting variables and weights, resulting in exceptional predictive accuracy of over 90% when assessing a patient's social determinants of health.
- **Using pre-trained Python models, the system identifies areas of opportunity** in real time, streamlining operations and optimizing healthcare processes.

### CUNY Tech Prep

New York, NY

Fellow, Software Development

July 2021 – May 2022

- **Learn in-demand technologies like React, Node.js, Express, and PostgreSQL** as well as industry best practices for design, implementation, and deployment such as MVC, version control with Git/GitHub, agile & Scrum with Slack, test driven development, and CI/CD

Ambassador, Brooklyn College

October 2021 – May 2022

- **Selected to be an Ambassador out of 100+ students to represent CUNY Tech Prep** at various outreach events.
- **Conducted outreach events,** such as workshops and info sessions for prospective CUNY students to understand the benefits of CUNY Tech Prep and learn marketable skills, such as technical interviewing.

## PROJECTS

**Let's Play Reviews :** <https://letsplayreviews.onrender.com/>

May 2023 – Present

- **Leveraged Figma to design user interfaces that enhance page workflows,** resulting in a seamless and intuitive user experience.
- **Developed a visually engaging React TypeScript web application** that allows users to review, discover, explore, and discuss their favorite video games.
- **Engineering a database using the Django framework and Python,** enabling efficient storage and retrieval of both gaming and user data.

**Up To Skate :** <https://uptoskate.onrender.com/>

September 2022 – March 2023

- **Developed a user-friendly React web application using TypeScript to make reusable components** for a platform that empowers users to search and explore skater information, upcoming events, and past results, consolidating all figure skating knowledge in a single accessible place.
- **Utilized Figma to craft user interfaces that thoughtfully outline page workflows,** ensuring a fluid user experience.
- **Engineered a reliable database infrastructure using Node.js, Postgres, and Sequelize,** enabling efficient storage and retrieval of skater and event data.
